

HIMANSHI SHARMA

Software Engineer (Data Analyst · Generative AI · Agentic Systems — RAG, LangChain, LangGraph)

+91 9588800923 | himanshi27placement@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer specializing in Data Analytics and Generative AI, with hands-on experience delivering production-style systems including Retrieval-Augmented Generation (RAG) pipelines, agentic systems built with LangChain and LangGraph, and computer-vision models for automated document analysis. Skilled in Python, SQL, and Power BI, with additional exposure to full-stack development, machine learning, and workflow automation using the Microsoft Power Platform. Delivered end-to-end projects spanning predictive analytics, business intelligence dashboards, and NLP-driven automation, backed by verified certifications in SQL, data analytics, and cloud/AI technologies. Brings a rare blend of data analytics rigor and applied Generative AI delivery, ready to create immediate impact on a data, AI, or engineering team.

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Data Analytics & Generative AI | Tata Consulting Engineers (TCE)

June 2026 – August 2026

- P&ID Symbol Detection System:** Built and trained a computer vision model (Python, OpenCV) to automatically detect and classify equipment symbols in P&ID engineering diagrams, automating a traditionally manual review process.
- RAG-Based Document Q&A Pipeline:** Designed and deployed a Retrieval-Augmented Generation (RAG) pipeline using LangChain, vector embeddings, and LLMs to deliver accurate, context-aware answers over technical documents, reducing hallucination risk.
- Agentic AI Task Automation System:** Developed a multi-agent, tool-calling workflow with LangGraph to plan and execute multi-step tasks autonomously, integrating with Microsoft 365 (Planner, Power Apps) for real-world execution.
- Microsoft Planner Reporting Automation:** Built a real-time reporting workflow using Microsoft Planner, Microsoft Lists, and Power Automate, implementing duplicate detection, conditional create/update logic, and interactive dashboards across departments.
- Additional Contributions:** Explored video analytics and point cloud processing for engineering use cases, and coordinated on-site logistics for a company walk-in recruitment drive.

Full-Stack Web Development Intern | Myna Seva Foundation (in collaboration with AICTE)

July 2025 – August 2025

- Key Contributions:** Built front-end and back-end features for web applications and applied AI-driven automation to marketing workflows, as part of a project-based technical program.

PROJECTS

Customer Churn Analysis & Prediction Dashboard

Python, SQL, Pandas, Streamlit, SHAP

- Analyzed 7,000+ customer records to identify churn patterns and key retention drivers.
- Performed data cleaning, transformation, and exploratory data analysis (EDA).
- Built a Random Forest classification model for churn prediction and applied SHAP for model explainability.
- Developed an interactive Streamlit dashboard for customer risk analysis and business reporting.

Personal Finance Analysis Tracker

Python, Flask, SQLite

- Developed a full-stack finance tracking application to monitor income, expenses, and budgets.
- Managed transactional data in SQLite and enabled CSV export for downstream reporting and analysis.

TECHNICAL SKILLS

- Generative AI:** LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Agentic Systems, Prompt Engineering, LLMs, NLP, Vector Databases
- Programming:** Python, SQL, Full-Stack Web Development
- Machine Learning:** Scikit-learn, Random Forest, Model Explainability (SHAP), Statistical Analysis, Predictive Modeling
- Data Analytics:** Data Cleaning, ETL, EDA, Data Wrangling, Data Pipelines, MySQL, SQLite
- BI & Visualization:** Power BI, Excel (Pivot Tables, VLOOKUP, Power Query), Matplotlib, Seaborn
- Automation & Microsoft 365:** Power Automate, Power Apps, Microsoft Planner, API Integration
- Computer Vision:** Object Detection, OpenCV, Video Analytics, Point Cloud Processing
- Tools:** Jupyter Notebook, Git, GitHub, Streamlit, Flask
- Soft Skills:** Analytical Thinking, Problem Solving, Stakeholder Communication, Agile Collaboration

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering (IoT & Cyber Security, incl. Blockchain)

National Institute of Electronics & Information Technology (NIELIT), Ajmer | 2023–2027 (Final Year) | CGPA: 8.60/10

CERTIFICATIONS

HackerRank SQL (Intermediate) • Data Analytics Certification — CodeWithHarry • AI & Cloud Technologies Internship — Edunet Foundation, IBM SkillsBuild & AICTE • Introduction to Cybersecurity and Ethical Hacking — NIELIT • Data Science and Machine Learning — IIT Guwahati (Summer Analytics)
